

NEW Polyethylene (PE) mains tracer with line and tip tracing capabilities

Approved for use on 63mm to 180mm pipelines operating at pressures up to 2bar.

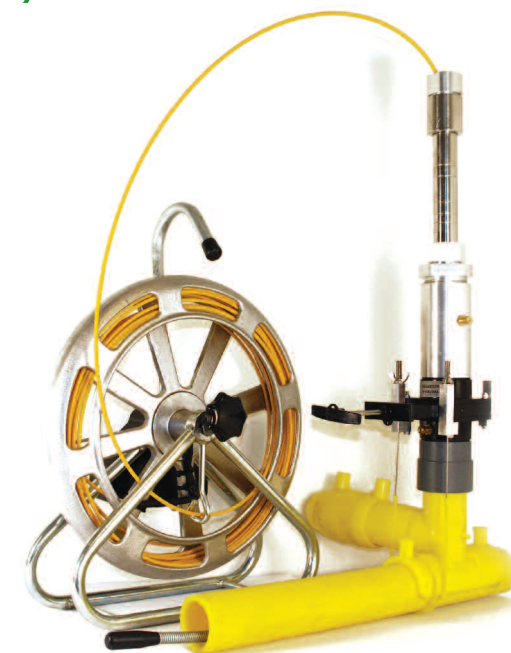

Applications:

- Line (—) and tip (—) tracing capabilities.
- Entry via vertical insertion through a PE 63mm top tee.
- Live launch and retrieval assembly for pipes sized 63mm – 180mm.
- Can trace up to 80 metres of PE gas mains in each direction (total length up to 160 metres).
- Allows removal and replacement of the PE cutter.

Benefits:

- Significantly reduces excavation, reinstatement and associated activities.
- Enables PE pipe systems to be accurately identified.
- Significantly reduces operational costs.

Aftercare:

Stargland™ system is available with a complete product support package including: easy to use installation instructions, a comprehensive training package and after sales service.
